Medwell.com to Offer Tavoca Reminders

Westlake Village, CA November 4, 2003 Medwell.com has selected Tavoca to provide automated telephone appointment reminders for their medical clients. Medwell provides a number of services to physicians, including their Freedom Suite practice management software solution. Medwell also provides value-added web-based services to physicians and their patients through their portal site, www.Medwell.com.

Tavoca will provide automated telephone appointment reminders as an imbedded optional solution within the Medwell.com site. Medwell subscribers will have full access to the Tavoca suite of applications without ever having to leave the Medwell site. The sites and the data exchanged between them are secure and fully HIPAA compliant.

“We appreciate the opportunity to work with Medwell and the thousands of physicians that utilize their web-based services as well as their practice management solutions”, says John Tadlock, President of Tavoca Inc. “Our rapid growth in the appointment reminder business has been significantly enhanced by relationships with other savvy technology companies such as Medwell.”

Tavoca provides a variety of automated telephony solutions, including appointment reminders, test results messaging, mass message delivery, personal reminders, and wake up calls. Tavoca also offers customized solutions for civic, educational, religious and government organizations. You can learn more about Tavoca by visiting www.tavoca.com.
